THE City and the Country are bound together by the telephone line.

The farmer and his family use the rural telephone constantly, calling up each other and the market town on all sorts of matters and for all sorts of supplies and information.

City people also find the rural telephone of great advantage. A traveller from his room in the hotel talks with the farm folk miles away. Without the telephone he could not reach them.

The farmer himself may travel far and still talk home over the Long Distance Lines of the Bell System.
